# Cutting-Edge Feature Improves Compliance, Accelerates Reimbursements Reduces Costs.

Eliminate human error in claims processing by automatically providing and suggesting the base rate and mileage codes while making a medical necessity selection and applying diagnosis codes.

## **Robust technology.**

The AdvanceCode feature in our AdvanceClaim fully-hosted, 100% web-based billing solution uses a unique, patent-pending algorithm based on the data in a NEMSIS file to automatically add the proper codes and rates to review.

## **ICD-10 compliant.**

Sit back and watch while a trip is automatically coded according to Medicare-defined rules that ensure payment on claims.

## **Flexible offering.**

EMS organizations can define the dispatch reason codes and intervention levels to their current processes.
